Total	15	48	

After completion of the course, the students shall be able to:

1. Identify and formulate a research problem that is significant, original, and feasible.
2. Conduct a systematic and critical review of the relevant literature and sources to support and contextualize the research problem.
3. Develop and justify a research argument that is clear, coherent, and persuasive, using appropriate evidence, reasons, and warrants.
4. Communicate the research argument effectively to the intended audience, using suitable language, structure, style, and visual aids.
5. Demonstrate ethical awareness and responsibility in conducting research
