Objective: Learn how to create clear and professional diagrams for research papers using visualization tools.

- **Instructions**
- **Choose one of the following tasks:**
 - **Task A:** Redraw a **Proposed Method Flowchart** from a given research paper.
 - **Task B:** Create a **Taxonomy Diagram** for AI subfields (e.g., NLP, CV, RL).
 - **Task C:** Design an **SLR Workflow Diagram** (PRISMA style).
- **Tools Allowed:**
 - **Draw.io (diagrams.net)**
 - **Microsoft PowerPoint**
 - **Lucidchart** (free version)
 - **LaTeX (TikZ)** for advanced users
- **Requirements:**
 - Include **title and figure number** (e.g., Figure 1: Proposed Method Flowchart).
 - Use **consistent shapes and colors**.
 - Export as **PNG or PDF** (high resolution). Minimum 300 DPI
- **Submission:**
 - Upload your diagram file and a short note (2–3 lines) explaining your design choices.
- **Evaluation Criteria**
- **Clarity & Readability (40%)**
- **Accuracy of Representation (30%)**
- **Aesthetic & Consistency (20%)**
- **Proper Caption & Numbering (10%)**
